

## Project Design Phase Solution Architecture

|                     |                                       |
|---------------------|---------------------------------------|
| Date                | 2 july 2026                           |
| Team Id             |                                       |
| Name of the project | A Comprehensive Measure of Well-Being |
| Maximum marks       | 4 marks                               |

### Solution Architecture:

The user opens the HDI Prediction and Analysis System.

The user enters indicators such as Life Expectancy, Education Index, and GNI per Capita.

The application validates and preprocesses the input data.

The trained machine learning model predicts the HDI score.

The system classifies the country into Very High, High, Medium, or Low human development.

The dashboard displays the prediction along with charts, comparisons, and insights.
